EDUCATION

University of Michigan at Ann Arbor

Aug 2023- May 2025

Master of Science in Information Science (Human-Computer Interaction)

GPA : 4.0

Coursework: Interaction Design, Usability Testing, Fundamental of Design

University of Illinois at Urbana-Champaign

Aug 2020- May 2022

Bachelor of Science in Computer Science

RELEVANT EXPERIENCE

Reap Rewards

August 2023 – Dec 2023

UX Designer

Ann Arbor, Michigan

- Researched the problem space with qualitative research methods like user interviews and competitive analysis
- Developed comprehensive design artifacts including personas, complex user flow, Information Architecture Diagrams and wireframes using industry standard tools like FigJam.
- Designed high fidelity prototypes with complex interactions in Figma and improvised the product by conducting heuristic evaluations and 50 usability tests.

Detroit's Aging Water Infrastructure

August 2023 – Dec 2023

UX Researcher

Ann Arbor, Michigan

- Collaborated with the department of Environment, Great Lakes and Energy to propose potential solutions for communication regarding the aging water infrastructure problem in Detroit
- Developed interview protocols for semi-structured interviews and conducted interviews with both scoped participants and subject matter experts. Employed Affinity Wall Diagram to analyse and interpret findings derived from the interviews.
- Conducted quantitative analysis on a dataset containing 900,000 entries to evaluate the existing communication solutions, identifying and capturing trends and insights.

Itlize Global

August 2022 – April 2023

Software Engineer

New Brunswick, New Jersey

- Consulting clients to improve, migrate existing systems to modern technologies to boost performance
- Creating efficient and scalable full stack solutions for clients using ASP.NET Core, Angular and Azure Service

Crowd Dynamics Lab

May 2021 – May 2022

Researcher

Champaign, Illinois

- Investigated the effectiveness and impact of diverse methods to increase user donations for COVID-19
- Created a website for testing our research hypothesis using Node JS along with D3.js for advanced visualizations
- Spearheaded a cross-functional team, collaborating with designers, developers, and researchers for successful project execution.

The Bulletin.io

May 2021 – Jan 2022

Software Engineering Intern

Chicago, Illinois

- Implemented a real-time transit system using various transit data feeds paired with Google Map integration using NodeJS and Angular JS, resulting in a 30% increase in user satisfaction.
- Optimized the application using Firebase NOSQL database as caching to improve render times by 50%
- Improvised the user authentication by implementing password-less sign-in
- Created a dashboard for managing third party advertisers with their REST API and data from GCP's Datastore
- Built a web scraper to automate lead acquisition for the sales team using headless Chrome using Puppeteer

LEADERSHIPS

School of Information Masters Association

August 2023-Present

Treasurer

Ann Arbor , Michigan

- Oversaw the financial management of the organization, including vendor negotiations and finalizing transactions

Project XX

March 2020-Present

Co-Founder

Champaign , Illinois

- Managed a team of 15+ people to work on issues that are stigmatised in our society
- Collaborated with people from Canada, US, India, the Philippines to work on various projects

TECHNICAL SKILLS

Languages: Java, C, C++, Python, C#, Node.js, MongoDB, SQL, HTML/CSS, JavaScript , Angular, React

Experience in Git, AWS, GCP, Jira, Data Structures, Database systems, Algorithms, Machine Learning

Tools : Figma, Photoshop, Illustrator, Unity , Unreal, Miro, Qualtrics,
